Single Monument

Double Monument

Family Monument

MONUMENTS

- The Cemetery regulates the type of symbol, inscription, size, shape, quality and material of all monuments.
- Your monument dealer must submit a Monument Installation/Inscription Application.
- New Jersey law requires the Cemetery keep monuments reasonably level and plumb for ten years after initial installation. If after ten years the monument settles or becomes tilted, it can be leveled at the owner's expense.

FOUNDATIONS

- A concrete foundation installed by the cemetery is required prior to the setting of any monument or accessory.
- Arrangements for foundations are included in the monument application.
- The foundation will be installed no sooner than nine months from the date of burial, and a minimum of four weeks from the approval of the monument application.
- The top surface of the foundation is poured approximately one inch below grade.

UNVEILINGS

- Be certain to notify the cemetery of your unveiling date.
- The cemetery will landscape the grave before an unveiling with advance notice and payment.
- An unveiling cloth can be placed on the monument upon request. *A voluntary \$20 payment that helps offset the cemetery's expenses is greatly appreciated.*
